Report

No.: 1003-S-87168
date of arrival: 30-03-2010

patient identification:cat	Maine Coon	
male		* 09.07.09
date sample was taken:		
owner / animal ID:	Törvonen, Anna-Maija (54837)	
type of sample:	blood	

parameter	value	reference value
name:	"Tropikoone Little Thunder"	

genetic test hypertrophic cardiomyopathie (HCM)

HCM1:

Result HCM1: genotype N/N

Interpretation: The analyzed cat is a noncarrier of the mutation in the MYPBC gene (G->C in exon 3) which is suggested to be responsible for hypertrophic cardiomyopathy (HCM) in Maine Coon cats and ragdoll. HCM of other genesis especially caused by the other mutation or other unknown mutations can not be excluded by this test. The test result is only valid for the submitted sample and for Maine coon and ragdoll and related breeds.

pedigree-id: FIN SRK LO 90645
chip-id: 968000005547021
tattoo-id: ---

The lab is accredited according to DIN ISO 17025 (AKS-PL-20922) for the services mentioned above. Responsibility for the correctness of animal ID data corresponding with the samples lies in the hands of the sender. Warranty cannot be accepted. Claim for damages is limited to the amount of the invoice for the performed lab test if not otherwise regulated by law.
